

Presentation of MAR-ECO students

Name: Nina Svane-Mikkelsen

Nationality: Danish

Institution: Dept. of information science and media studies, [University of Bergen \(UIB\)](http://www.uib.no), Norway

e-mail: Nina.Svane-Mikkelsen@infomedia.uib.no

Degree: PhD Scholar

Working title of project:

The total PhD-project: ***Affinity and Battlefield.***

New media and museum communication- Communication design under imperative of database. Artistic intervention as a narrative grip.

The sub-project for and with MAR-ECO: ***Techno-variations over Life in Darkness.***

Summary of Project: *Affinity and Battlefield* consists of 2 practical new media projects (*Techno-variations over Life in Darkness* and *Your School's Upbringing*) which, together with theoretical (thesis) and documentary work (*The Museum in a New Media Landscape*), form a research triangle aiming for investigating forms of communication within museum and new media.

The project for and with Mar-Eco with the work-title: *Techno-variations over Life in Darkness* takes a broad view on the MAR-ECO working process as well as the MAR-ECO results. A multimedia composition is developed with different modules, varied sub-themes and forms of expression. Artists from different areas of specialization, creative media-workers and researchers will contribute and be involved in both the project development and the production on different levels and to a varied degree. A focus is held on the communicative aspects of the work and use of new digital media. *Techno-variations over Life in Darkness* will be exhibited at Bergen Museum and will also have off-site digital modules that can be experienced within the 'geography' of digital network connections" or off-line through a digital storing media.

Supervisor: Prof. Peter Larsen, Dept. of information science and media studies, UIB.
